

MONIHელი

Forum for Multicultural Network

Monikulttuuriyhdistys
Familia club ry

Objectives for the MoniHeli Project are to plan and develop the multicultural forum for the immigrant organizations around Helsinki metropolitan area. Its purpose is to increase and improve cooperation between various organizations. Networking will offer each organization better opportunity to arrange the activities they are primarily founded for and also come up with new ideas and activities. Multicultural association Familia Club coordinates Moniheli project.

Our purpose is to provide a functional network for migrants organizations which enables them to operate more efficiently in their activities through networking with other organizations all dealing with similar issues and aiming for the same outcome. Through networking we can offer practical help and advice on financing, administration, education, providing information and recruiting members. We also would like to believe in the idea of civil society and having better possibilities to influence on society as a group in which all members have the same objectives. During the process of establishing a multicultural network, it is important that members are actively and equally involved in planning and decision-making.

Through three progressive steps – planning and decision making as a group, founding a forum and developing the means of supplying services and arranging activities - we try to form a coordinating centre from which information and services can be easily attained. Through providing outsourcing services forum should be carried to foreseeable future.

Forum welcomes to join in also those individual immigrants whom are not members of any organization but interested in getting involved with multicultural networking. We also welcome any other organizations or groups involved with multicultural issues. Our goal is to establish broad and well-functioning network to benefit all its members
